ONLINE LEARNING

ATP Prep and Recertification

Assistive Technology Training Program (ATTP)

This self-study program consists of 10 online modules that will assist you in preparing for RESNA's ATP certification exam. The content provides a basic foundation of knowledge in the provision of all categories of assistive technology (AT). VGM Education is authorized by IACET to offer 3.0 CEUs for this program. **Content Includes:**

- Consumerism and service delivery of AT
- Basic anatomy, physiology, and impairments
- Fundamentals of engineering and biomechanics
- Applications of AAC, EADLs, alternative computer access, sensory technologies, and seating and mobility
- AT in the home, workplace and school; wheelchair transportation
- Funding and legislation

Seating and Mobility Master Program

This comprehensive program offers both education in the fundamentals of assistive technology to assist you in preparing for the ATP exam, as well as in-depth clinical and technical theory to assist you in your role as a professional in the specialty area of seating and wheeled mobility. The continuum of online courses and webinars can be completed at your own pace. VGM Education is authorized by IACET to offer 7.9 CEUs for this program. **Content Includes:**

- A foundation of information on topics and content covered on the ATP exam
- In-depth education in the pathology and characteristics of complex disabilities
- A deep dive into the prescription and provision of seating and wheeled mobility for individuals with complex disabilities
- Complete coverage of Medicare reimbursement policies and documentation strategies for seating and wheeled mobility products
- Webinars by content experts

Augmentative and Alternative Communication

These new online courses, which can be purchased individually or in a bundle, offer education for anyone wanting to learn or brush up on their knowledge regarding Augmentative and Alternative Communication (AAC) technology. These courses can also help prepare those training to become an ATP as AAC is a portion covered in the RESNA ATP certification exam. VGM Education is authorized by IACET to offer 0.1 CEU for each course and 0.3 CEUs for the bundle. **Content Includes:**

- Background and Assessment of Need
- Access Considerations
- Intervention and Progress Monitoring

AT Fundamentals Course

U.S. Rehab has partnered with RESNA to provide the AT Fundamentals in Technology course. Designed with the busy AT professional in mind, the AT Fundamentals Course helps students review and refresh their assistive technology knowledge and identify areas for further study in preparation for the RESNA ATP certification exam.

This instructor-led live course includes the ability to ask questions live, test one's knowledge with in-session quizzes, and review recorded sessions afterward for further study. Upon successful completion of the course and the final quiz evaluation, participants will earn CEUs and receive a code for a free practice RESNA ATP certification exam. *Please note that this is not a RESNA ATP certification exam course.

Visit vgm.com/atfundamentals for more information.

Tech Training

U.S. Rehab offers hands-on seminars and online programs for repair technicians to learn product specifics, basic repair strategies, troubleshooting, and programming.

In-Person Tech Training Seminars

U.S. Rehab Tech Training is an in-person, hands-on manual and power wheelchair repair seminar. Technical trainers from several key manufacturers present on product specifics, basic repair strategies, troubleshooting, and programming. VGM Education is authorized by IACET to offer up to 1.6 CEUs for this program. When a technician passes the final Tech Training exam, their company will receive additional parts discounts from Permobil, Motion Concepts, and MK Battery.

Visit vgm.com/usrehab/tech-training-seminars/ for upcoming dates and locations.

Online Tech Training

U.S. Rehab, a DMERT Group* partner, offers two levels of online tech training, accommodating training needs from day one and beyond. Material presentation includes detailed demonstrations to identify equipment failure and repair execution. Both Rehab Tech Training course bundles are DMERT-approved Accelerated Education. VGM Education is authorized by IACET to offer 2.0 CEUs for DMERT Level 1 and 1.2 CEUs for DMERT Level 2.

Level 1 provides a thorough understanding of basic medical equipment, walkers, and manual wheelchairs to hospital beds, scooters, and Group 2 consumer power chairs.

Level 2 provides a thorough understanding of CRT medical equipment, seating basics and adjustments of seating products for the tech, high-end manual wheelchair repair and adjustments, and repair and programming of Group 3 power chairs with complex electronics.

*For more information regarding DMERT Group, visit www.dmertgroup.com.

Online Tech Training: Fundamentals of Repair: Power and Manual Wheelchairs

This online course bundle program will help your techs learn the basics of wheelchair repair. The program includes the classes listed below. VGM Education is authorized by IACET to offer 0.5 CEUs for this program.

- RWB006 How to Use a Multimeter
 - RWB007 Batteries for PWCs and Scooters
 - RWB008 Introduction to Power Wheelchairs for the Repair Technician
 - RWB009 Introduction to Scooters for the Repair Technician
 - RWB010 Introduction to Manual Wheelchairs for the Repair Technician
-

Telehealth Education Program

U.S. Rehab's telehealth education program is made up of six video modules related to the application of telehealth for wheelchairs.

- TEP001 Introduction to Telehealth
- TEP002 HIPAA Compliance
- TEP003 Face-to-Face Examination
- TEP004 Wheelchair Evaluation
- TEP005 ATP Assessment and Home Assessment
- TEP006 Functional Mobility Assessment

In addition to a general overview of telehealth and compliance with telehealth, the modules will take you through considerations of telehealth with the various required documents for complex wheelchairs (face-to-face, LCMP wheelchair evaluation, ATP assessment, home assessment, etc.).

Reimbursement Training

Reimbursement Master Program

Our Reimbursement Master Program is designed to help those in the DMEPOS industry become more familiar in the billing arena and learn the basics of reimbursement.
