ONLINE LEARNING

ATP Prep and Recertification

Assistive Technology Training Program (ATTP)

This self-study program consists of 10 online modules that will assist you in preparing for RESNA's ATP certification exam. The content provides a basic foundation of knowledge in the provision of all categories of assistive technology (AT). VGM Education is authorized by IACET to offer 3.0 CEUs for this program.

Content Includes:

- Consumerism and service delivery of AT
 - Basic anatomy, physiology, and impairments
 - Fundamentals of engineering and biomechanics
 - Applications of AAC, EADLs, alternative computer access, sensory technologies, and seating and mobility
 - AT in the home, workplace and school; wheelchair transportation
 - Funding and legislation
-

Seating and Mobility Master Program

This comprehensive program offers both education in the fundamentals of assistive technology to assist you in preparing for the ATP exam, as well as in-depth clinical and technical theory to assist you in your role as a professional in the specialty area of seating and wheeled mobility. The continuum of online courses, webinars, case studies and one-on-one assistance can be completed at your own pace. VGM Education is authorized by IACET to offer 7.9 CEUs for this program.

Content Includes:

- A foundation of information on topics and content covered on the ATP exam
 - In-depth education in the pathology and characteristics of complex disabilities
 - A deep dive into the prescription and provision of seating and wheeled mobility for individuals with complex disabilities
 - Complete coverage of Medicare reimbursement policies and documentation strategies for seating and wheeled mobility products
 - Webinars by content experts
 - Case study exercises
-

AT Fundamentals Course

Are you looking to become an ATP? U.S. Rehab has partnered with RESNA to provide the AT Fundamentals in Technology course. Designed with the busy AT professional in mind, the AT Fundamentals Course helps students review and refresh their assistive technology knowledge and identify areas for further study in preparation for the ATP exam.*

This instructor-led live course includes the ability to ask questions live, test one's knowledge with in-session quizzes, and review recorded sessions afterward for further study. Upon successful completion of the course and the final quiz evaluation, participants will earn CEUs and receive a code for a free practice AT exam.

*This training course will help candidates review and refresh their assistive technology knowledge and may help identify areas they need to study for the ATP exam, but it is not an ATP exam prep course.

Visit vgm.com/atfundamentals for more information.

Tech Training

U.S. Rehab understands the importance of properly trained wheelchair repair technicians. U.S. Rehab offers hands-on seminars and online programs for repair technicians to learn product specifics, basic repair strategies, troubleshooting, and programming.

In-Person Tech Training Seminars

U.S. Rehab Tech Training is an in-person seminar on manual and power wheelchair repair. Technical trainers from several key manufacturers present on product specifics, basic repair strategies, troubleshooting, and programming. VGM Education is authorized by IACET to offer CEUs for this program. If a technician passes the final Tech Training exam, their company will receive additional parts discounts from Permobil, Motion Concepts, and MK Battery. Contact U.S. Rehab or visit learn.usrehab.com/tech-training/in-person for upcoming dates and locations.

Online Tech Training: The DMERT Group Certification Program

The DMERT Group is a non-profit certifying body tasked with setting the benchmark for durable medical equipment and complex rehab repair training standards. By collaborating with the entire industry, the DMERT Group serves to establish standardized training guidelines. U.S. Rehab partners with the DMERT Group to offer a training program that has a number of benefits for employers, prospective students, and the industry as a whole.

The DMERT Certification is separated into three training levels:

DMERT LEVEL 1: Basic medical equipment from walkers and manual wheelchairs to hospital beds, scooters, and Group 2 consumer power chairs. This is approved for CEUs.

DMERT LEVEL 2: CRT manual wheelchairs, Group 3 power chairs, and basic seating adjustments and installation. This is approved for CEUs.

DMERT LEVEL 3: Technician trainer able to teach and train in community colleges or any other approved training venue.

To obtain each certification, technicians must pass an online theory exam and in-person competency exam.

The University of Pittsburgh, Department of Rehabilitation Science and Technology Continuing Education (RSTCE) is certifying the educational contact hours of this program and by doing so is in no way endorsing any specific content, company, or product. The information presented in this program may represent only a sample of appropriate interventions. Each person should claim only those hours of credit that they actually spent in the educational activity.

Online Tech Training: Fundamentals of Repair: Power and Manual Wheelchairs

This online course bundle program will help your techs learn the basics of wheelchair repair. The program includes the classes listed below. VGM Education is authorized by IACET to offer 0.5 CEUs for this program.

- RWB006 How to Use a Multimeter
- RWB007 Batteries for PWCs and Scooters
- RWB008 Introduction to Power Wheelchairs for the Repair Technician
- RWB009 Introduction to Scooters for the Repair Technician
- RWB010 Introduction to Manual Wheelchairs for the Repair Technician
