– ACU-Serve

Dan Fedor
Director of Reimbursement
U.S. Rehab

Wayne Grau
Executive Director
NCART

Description

Seat Elevation became a covered benefit on May 16, 2023 and since then there have been several clarifications and updates. But none as big as the one coming in 2024. In mid Nov CMS announced the Second Biannual 2023 Healthcare Common Procedure Coding System (HCPCS) Public Meeting Agenda which is scheduled for Nov 30. The agenda contains their preliminary decision on seat elevation which contains the following preliminary decisions:

- Discontinue E2300
- Create one code for CRT seat elevation any type
- No code for heavy duty
- Preliminary payment decision \$2,261.89 fee schedule amount
- Discontinue codes K0830 and K0831
- Create one new code for standard seat elevation any type

Final decisions are not made at the public meeting. CMS's final coding, benefit category, and payment decisions will be published around February 2024 and will be effective April 1, 2024.

In this webinar learn the proper billing codes, modifiers and fee schedule in place NOW AND the predicted changes that will be effective sometime in early 2024. The speakers will also address the wheelchair base code determination as well as when to use the upgraded electronics (E2310, E2311, E2377 and E2313) to ensure proper billing and reimbursement for this LIFE Changing Accessory.
